SPECIAL OIL FURNACE EDITION
Summer 2000

Featuring the Fine Family of Comfortmaker Oil Furnaces

Including New Models Shipped with Burners Installed

The Comfortmaker family of oil furnaces now offers new "easy access" models for a wide range of applications:

- **OLR & OLF**

Lowboy Oil Furnaces.

Three new oil furnace models are designed for lowboy applications. Front or rear breech models are available.

- **OUF Hiboy Upflow Oil Furnaces.** Two new oil furnace models are available for upflow applications.

- **OCF Downflow/Horizontal Oil Furnace.**

Another new model is available for downflow and horizontal applications.

- **NOUF Upflow Oil Furnaces.** Two models—one with inputs up to 105 MBTUh and one with inputs up to 160 MBTUh—are designed for customers who want a complete furnace, without having to order burners, vestibules and nozzles separately.

- **NOLF Lowboy, Front Flue Oil Furnace.** Another complete furnace model with inputs up to 105 MBTUh, shipped complete with vestibule, burners and nozzles installed.

provide efficient access for set-up and service.

"The new oil furnaces are prewired for easy add-on of electronic air cleaners and power humidifiers," Eberlein said. "They are also air-conditioning ready for easy add-on. For easy cleaning, these furnaces are designed with a large external front clean out that is sealed from the blower compartment to avoid spreading soot."

These new Comfortmaker oil furnace models offer flexibility, durability, and reliability:

- **Flexibility.** The new **OLR, OLF, OUF, and OCF** oil models offer a choice of conventional chimney vent or through-the-wall direct vent for improved application flexibility. They also offer a choice of burners — either Beckett or Riello burners are available. Oil burners are ordered and shipped separately from the furnaces, and include a nozzle for the highest input that the furnace is rated for. (The **NOUF** and **NOLF** complete furnace models come with the Beckett AFG oil burners and barometric dampers.)

- **Durability.** The new Comfortmaker oil models are durable products in a heavy-duty, insulated cabinet with a sturdy, heavy gauge, hand-welded and tested heat exchanger, backed by a lifetime limited warranty. The burner is covered by a three year limited warranty and all other parts are covered by a one year limited warranty.

- **Reliability.** These models are equipped with multi-speed direct drive motors, permanently lubricated for long-life performance. The ceramic combustion chamber withstands temperatures of up to 2600° with unique "self-aligning" design.

All models of the **OLR, OLF, OUF, and OCF Oil Furnaces** are approved for direct vent applications. A different burner is required for a chimney vent than for a direct vent application. When the direct vent option is used, a vent termination kit and insulated flex vent kit must be ordered.

The **NOUF and NOLF Oil Furnaces** are used for chimney installations only.

"We now have units that can be ordered 'menu' style, with a choice of chimney vent or direct vent
